Dermatology

Our Dermatology Department deals with skin, hair, and nail diseases. We offer clinically proven treatments that will aid dermatological disorders, including venereal diseases.

On top of addressing our patients' skin, hair, and nail concerns, we also help them in managing acne, scars, pigmentation, hair loss, ageing skin, and more through advanced cosmetic dermatology services. With treatments backed by science, you can stay calm and let your hair down as our specialists develop proven solutions for your needs.

Treatment Procedures

- Acne scar treatment – Micro needling and Chemical Peel Treatments
- Radio surgery for benign conditions such as warts, moles and skin tags
- Cryosurgery for conditions such as warts and keloids
- Auto-implantation therapy for the treatment of multiple viral warts
- Intralesional therapies for keloids and alopecia areata
- Excision of benign and malignant skin lesions including narrow hole extrusion therapy for cysts and lipomas

Chemical Peels

- Chemical Peels for acne, pigmentation, and photoageing
- Anti-aging treatments like Botulinum Toxin and filler injections
- Mesotherapy for hair loss, under eye dark circles and facial rejuvenation, and scar revision techniques.

Facial Treatments

Hydrafacial is a multistep treatment that fuses hydradermabrasion and chemical peel benefits with antioxidants, hyaluronic acid, and peptides.

It is a step-by-step approach which removes dead skin cells, cleanses the skin of impurities, and bathes it with hydrating serums to give your face a soothing, refreshing, and highly-effective treat.

Many scientific studies and leading aesthetic practitioners in the industry concluded that Hydrafacial is the safest and most effective non-laser skin rejuvenation treatment. In fact, it yields better results than IPL (intense pulse light) and other common skin treatments for overall facial rejuvenation.

Hydrafacial Benefits

- More radiant and smoother skin tone
- Erases fine lines and wrinkles
- Reduces hyperpigmentation and brown spots
- Gives remedy for oily and acne-prone skins
- Tightens pores

Laser Treatments

Laser Hair Removal

Laser hair removal is an advanced hair removal process that exposes your skin to pulses of laser light in order to disable hair follicles. This revolutionary treatment exhibits long-lasting solutions for decades.

Benefits of working with certified dermatologists:

Although laser hair removal has brought an option to do the operation by yourself at home, it is still the certified dermatologists who know better and have the abundant experience and tools perfect for you. Below are the reasons why you should not consider conducting laser hair removal alone.

Precision:

Superb technology enables the technician to target dark rough hairs on the body without harming the skin.

Safety:

It is proven and tested that medical procedures are painless and safe.

Swiftness:

Using pulses of laser light, it can treat the smallest sections of your skin and face in minutes, while large areas like the back or legs take about an hour.

Convenience:

Results like your hairs were never there. Patients who attend sessions regularly experience lasting effects.

Aesthetic Treatments

Aesthetic Medicine:

Adam & Eve CMC wants its patients to regain their confidence and improve the quality of their lives by conducting treatments and producing results according to their liking. Improving cosmetic appearances will be the least of your problems with the help of our doctors' expertise accompanied by gold standard equipment.

Nutrition & Dietetics

Nutrition and Dietetics Department

You are what you eat. And our best nutritionists in Abu Dhabi want you to maintain a healthy lifestyle to prevent diseases and other illnesses by eating the right foods packed with nutrition.

Our nutritionists will ensure that our patients consume the right amount of nutrition that their bodies need through consultation and monitoring of personalized diet plans. The perfect nutrition care can prevent malnutrition and lower the risk of getting diabetes, cardiovascular diseases, hypertension, obesity, and more. Using the latest tools for body analysis, and blood and body tests, our clinical dietitian will tailor the perfect nutrition plan for every patient.

We also provide therapeutic plans that include meal planning and special monitoring that will help cure diabetes, hypertension, digestive disorders, and other diseases. Moreover, these effective plans include proper health treatments for pregnancy and lactation. Whatever your body needs, our clinical dietitians and nutritionists got you covered.
